About us

Fintech that moves your business forward.

More in the field of transaction processing, better customer service. The purpose of our work is to provide clients with access to high-quality and efficient solutions in the field of financial technologies. Payout is creative, innovative, and stubbornly pursues its business. It uses its unique ability to see the world of Slovak finance differently. We write our authentic story through our own work.

"Payout offers a combination of flexibility, speed and security. Our approach is innovation in the sense of: 'Move money like data'. Our payment infrastructure is modular, which means clients can choose exactly the features they need."

- Jana Hmírová, CEO, Payout a.s.

Customer support

We automate everything except communication with you.

Our customer support is here for you, even in the case of transaction verification, any questions, or to resolve discrepancies.

Chat - you can also find us directly in the Payout Banking environment. Just click on the question mark in the lower left corner of the screen.

Email - if you prefer a different form of communication than chat, please use our email address **support@payout.one**.

Phone - During business hours from 8:00 a.m. to 5:30 p.m., we will be happy to assist you with any requests at **+421 903 574 770**.

To resolve the situation quickly, please provide us with the following transaction information:

Transaction ID

Reference

Amount

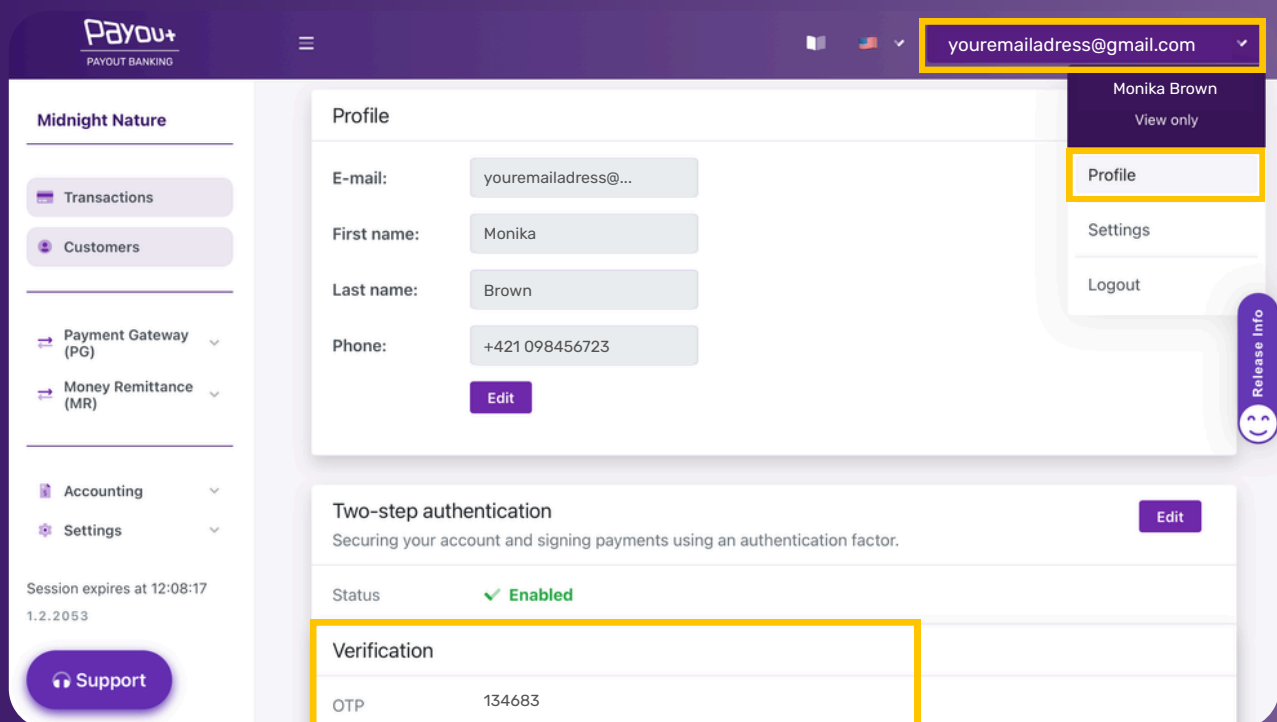

OPERATIONAL SUPPORT
from 8:00 a.m. to 5:30 p.m.

EMERGENCY SUPPORT
from 4 p.m. to 10 p.m.

Client verification

Customer support may ask you to verify your identity.

For a quick resolution of the situation, please log in to **Payout Banking**.

Customer support may ask you for:

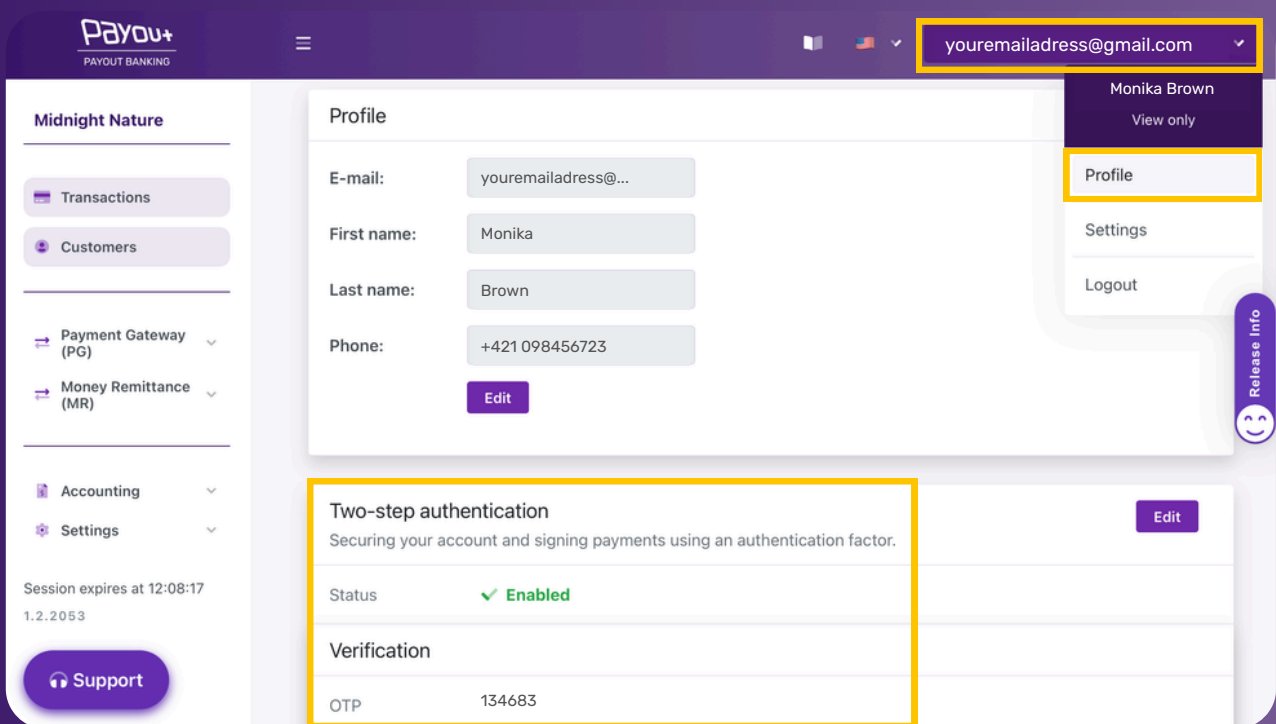

➔ **OTP code** - available in your profile

➔ **client authentication password** - the last 6 characters of the unique identifier specified in your Master Agreement or a password that you have already changed

2FA

Setting up/changing two-factor authentication

After logging into the Payout app, click on your **email address** in the upper right corner -> **Profile**.

In the Two-factor authentication section, click the **Edit** button.

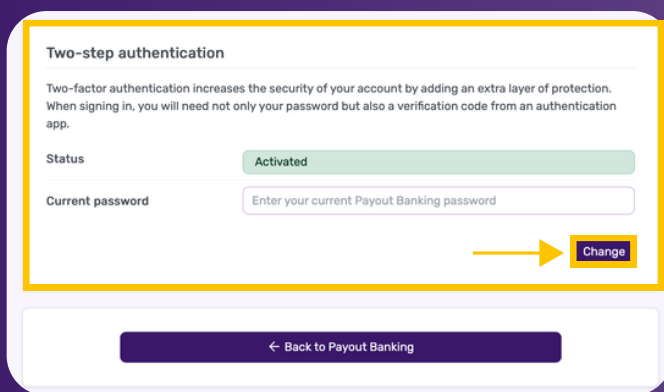

After clicking the Edit button, a new window with additional settings will open. In this window, go to the **Two-step authentication** section.

2FA

Setting up/changing two-factor authentication

To change the code, you need to do the following:

- ➔ Enter your **current password** that you use to log in to Payout Banking in the field.
- ➔ Then click on the **Change** button on the right side of the window.

Two-step authentication

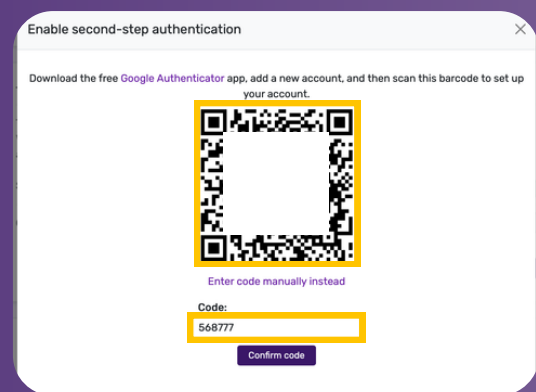

Two-factor authentication increases the security of your account by adding an extra layer of protection. When signing in, you will need not only your password but also a verification code from an authentication app.

Status: **Activated**

Current password:

Change

[← Back to Payout Banking](#)

Enable second-step authentication

Download the free **Google Authenticator** app, add a new account, and then scan this barcode to set up your account.

Enter code manually instead

Code:

Confirm code

A **QR code** will be displayed for you to scan in the authentication app. We recommend using the **Google Authenticator app**.

After scanning the QR code, enter the **6-digit code** from the authenticator and **Confirm code**.

Each time you log in or confirm a payment, you will enter the code from your preferred authenticator.

Forgotten password

Logging into Payout Banking

To obtain a new password, use the **Forgot password** button.

Security recommendations for signing in

Check the email address: Before signing in, make sure the address you are using belongs to the official Payout domain.

Be careful with links: Never click on links claiming to be from Payout Banking if you don't recognize them. We do not send Payout links by email.

Loss of login credentials: In case of loss or theft of authentication data, contact us at support@payout.one.

Don't have an account? Sign Up

This website uses only technically necessary cookies that ensure its proper functioning.

On the next screen, enter the email address you use to log in to your Payout account and continue to **Send password reset instructions**.

Password Reset

Email

Verify you are human

Send password reset instructions

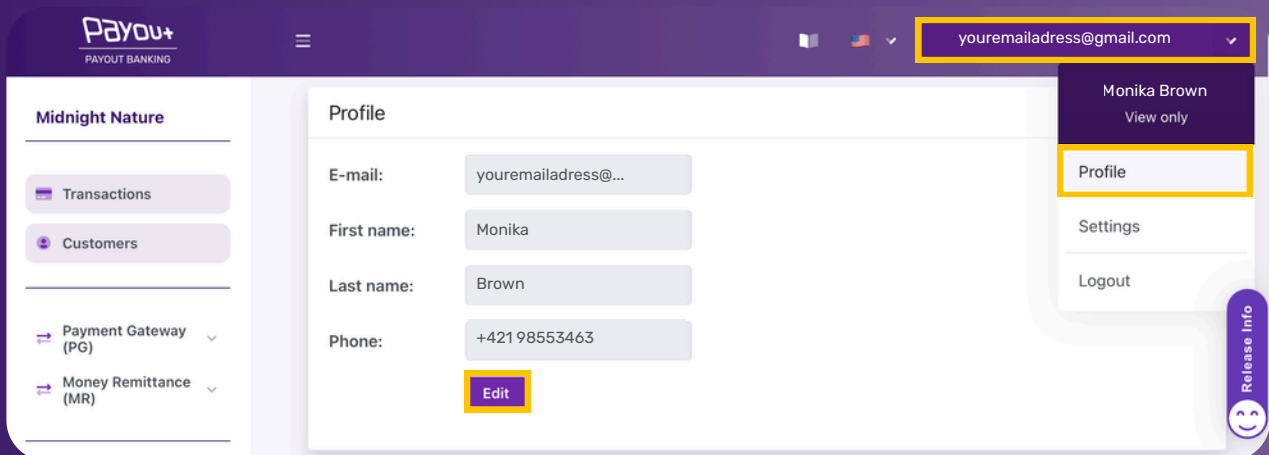

Did you remember the password? Sign in

Important: The reset link will be sent to the email address you entered in the previous step and is valid for **15 minutes**. After that, you'll need to generate a **new** link.

Password change

Changing your Payout Banking access password

You can change your access password in the **Profile** section by clicking on the **Edit** button.

After clicking, a new Profile Settings window will open. Go to the **Set new password** section. After entering your password, confirm the change by clicking the **Change Password** button.

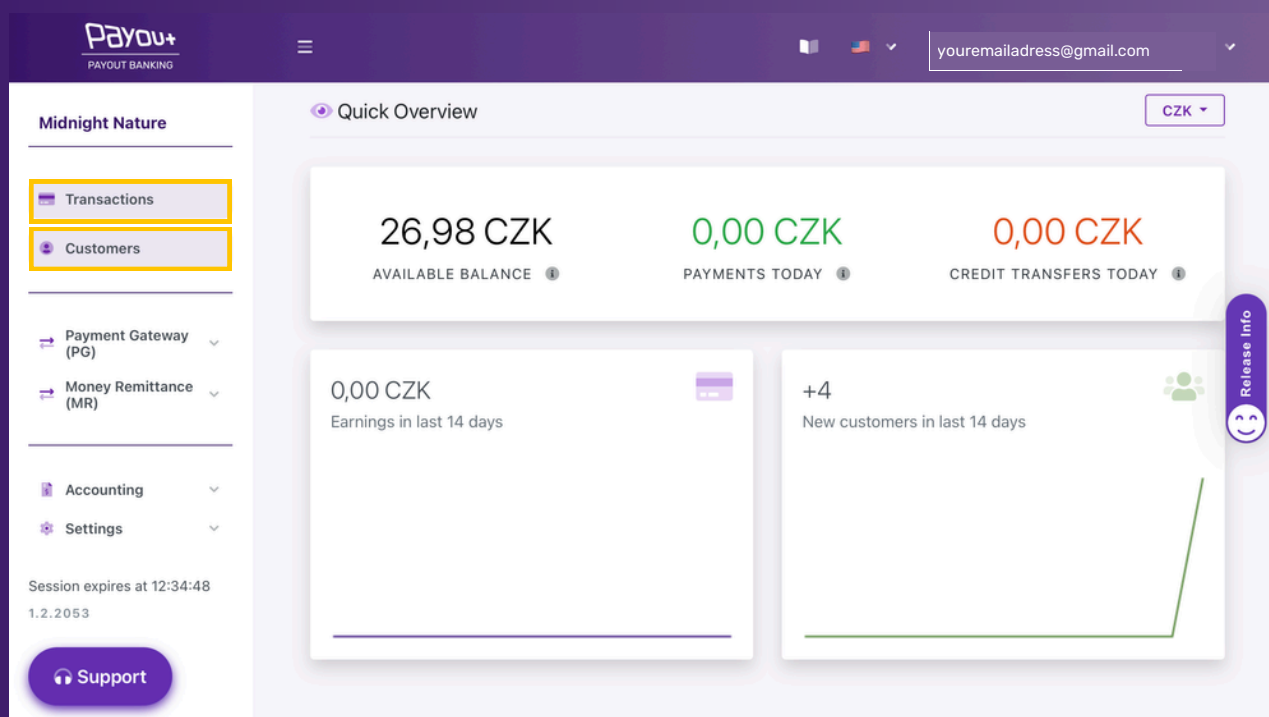

A screenshot of the 'Set new password' form. The form has three input fields: 'Current password' with the placeholder 'Enter your current Payout Banking password', 'New password' with the placeholder 'Enter a new password', and 'Confirm new password' with the placeholder 'Repeat the new password'. A yellow 'Change Password' button is located at the bottom right of the form.

A **strong** payment account **password** is **essential** to protect your funds and personal information from unauthorized access and fraud.

Quick selection for Payout Banking

In the quick selection, you will find:

- ✓ **Transactions** - overview of all transactions in Payout Banking
- ✓ **Customers** - overview of all customers in Payout Banking

Transactions

Transaction overview

In the quick selection, click on **Transactions**.

At the end of the table, we can see what type of services the transactions belong to.

New deposit

Receiving funds into Payout Banking

- Log in to Payout Banking,
- Click on **New deposit** in the quick selection,
- Select the amount and you will be redirected to the bank selection,
- Select your bank. If it is not on the list, we recommend selecting Tatra banka a.s.
- Enter the generated payment order directly into your bank's internet banking system.
- **Confirm** the payment.

The screenshot shows the Payout Banking interface. The top navigation bar includes the Payout Banking logo, a menu icon, and the user's email address 'youremailaddress@gmail.com'. The left sidebar contains a navigation menu with options: Transactions, Customers, New deposit (highlighted with a yellow box), Payment account Payout, Payment Gateway (PG), Accounting, and Settings. The main content area is titled 'New deposit' and features a form with an 'Amount' input field, a 'Currency' dropdown menu set to 'EUR', and a 'Continue...' button. A 'Release info' button is visible on the right side of the form. At the bottom left of the sidebar, it indicates 'Session expires at 11:38:44' and '1.2.2061'.

The initial Payout Banking deposit must be made from the **bank account** you specified in the **Framework Agreement**.

Transaction statuses

Payout Banking transaction overview

When you click on refund, the status in the transaction detail will change to **refunded** and **available**, and at the same time a refund transaction will be automatically created in the system for the customer whose funds are in pending status **pending** the appropriate reconciliation.

Overview of payment statuses in Payout Banking

successful and
available

successful and
pending

returned and
available

Once the reconciliation and pairing has been performed in our system, a **successful** transaction will change the status of the funds to **available**, at which point you can make a refund of the payment or make a reimbursement from the available funds.

Once the order is paid, the transaction enters a **successful** status and the **pending** balance **is set**.

Transaction statuses

Card payment and bank buttons

The customer fills in the checkout form, a checkout is created in the system.

When paying by card and via bank buttons, a transaction is automatically created in the system for the checkout, which will take the status of **successful** (at this point you have information about the success of the payment, but the funds are not yet credited to your Payout payment account) or **failed**.

Once such a transaction is reconciled and paired, the status will change to available and you can then dispose of the funds - either **make a payment** or **refund the payment**.

Changing your payment account access authorization is an important step to secure your funds and protect your account from unauthorized access. Each role has different levels of permissions.

New e-shop

Adding a new domain to Payout Banking

Adding a new domain for a new eshop

- ✓ **Adding a domain** - the domain **is added** to the Payout account **exclusively by** the Payout sales department.
- ✓ **New domain** - each additional domain is subject to **verification by** Payout's risk department. Without verification, the domain cannot be added.
- ✓ **Request to add a new domain** - contact Payout's sales department at **contact@payout.one** with your request.

The new domain must include:

Products

Documents

Final URL

In order to speed up the process of adding a new domain, it is necessary for the site to contain the following documents: **the General Terms and Conditions, the Complaints Policy and the Consent to the Processing of Personal Data.**

Notification email

Add/change email in Payout Banking

To add/change the notification email, go to **Settings => Notifications => Notification Email**.

The screenshot displays the 'Notification settings' page in the Payout Banking interface. The sidebar on the left shows the navigation menu with 'Settings' expanded and 'Notifications' selected. The main content area is titled 'Notification settings' and contains the following sections:

- Notification e-mail:** Two input fields containing the email addresses 'contact@midnightnature.com' and 'zuzana.ruzickova@payout.one'.
- Low balance notification:** A section with a description: 'After exceeding the set limit, an e-mail notification will alert you to a low available balance on your payment account.' It includes two dropdown menus for 'CZK' and 'EUR', both set to '0'.
- Document password:** A section with a description: 'This password will be used for encryption documents sent by e-mail.' It includes an input field containing the password '53101651'.
- Settings for invoices and statements:** A section with a description: 'Set up email addresses for delivering invoices and statements.' It includes an 'E-mail' input field.

A 'Support' button is located in the bottom left corner of the page.

Setting up the right **notification email** is a critical point for receiving notifications for **monthly invoices, daily/monthly statements, information about failed webhooks, and other important information.**

Refund of payment

Rules for returning payment to the customer

If a payment has been made by card and the client returns the payment, for example in cash or to a bank account, the original transaction is still visible as successful in the card companies' system. Your customer can therefore request a chargeback on the card and is very likely to succeed. Therefore, it is very important to keep all documentation and communication with the customer. **In the event that the card originally used is invalid, a refund can be made to the customer's bank account.** We recommend that you retain the customer's written request to return the payment to the specific bank account.

Why is it important to make the refund in the same way as the original payment was made?

Card companies and banking institutions have set strict rules for refunding payments. **When you pay by card, you must refund the payment to the same payment card, in less or the same amount as the original transaction.** Failure to comply with this rule puts you at risk of a **chargeback**.

Chargeback

The e-commerce world and its rules

What is a chargeback?

Chargeback means the verification of part or all of a transaction by the Cardholder directly with the Issuer as defined in the Card Company Rules.

You are in the e-commerce business, which is highly vulnerable to chargebacks. When paying by card, the cardholder is additionally protected, which can mean a higher risk for you.

Practical example: your customer will not settle a dispute with you, but directly with his bank. The customer has the option to request a chargeback from the bank. His bank then contacts VISA or MasterCard and the entire chargeback is passed on to us via our acquiring partners.
We will process the chargeback and contact you.

When can your customer go to their bank and make a chargeback?

- **The goods have not been delivered or the service has not been provided**
- **The order is incorrect or does not match the description**
- **The trader has ceased trading and has not delivered the service or goods**

Chargeback:

How to avoid it?

Unfortunately, it is not possible to prevent chargebacks with one specific step. It requires a set of measures that can save you a lot of money. **Our advice:**

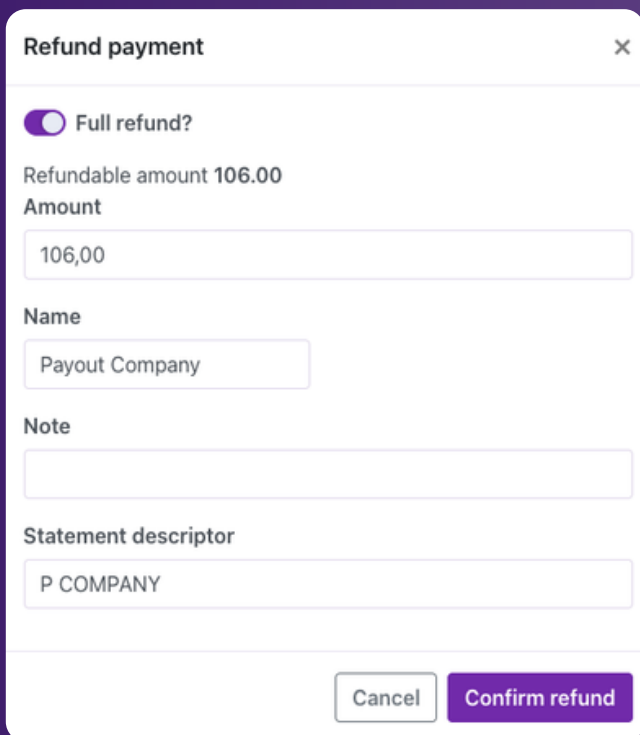

- ✓ **Take care of customer service** - regularly update email and phone contacts on your website. Respond promptly to client enquiries. Have clear and simple forms for any complaints or cancellations.
- ✓ **Good records** - in the case of a chargeback and its defence - good records make all the difference. Keep orders, invoices, delivery receipts, customer communications, all versions of GTCs, etc. If necessary, be prepared to translate documents into English.
- ✓ **Put processes in place to prevent fraud** - modify the GTC to be fair to the customer, but protect yourself at the same time. For example, don't offer a "lifetime" guarantee of access to a service or a guarantee beyond the law. Even years later, your client may claim that the service was not delivered and ask for a chargeback.

Despite your best efforts, a chargeback may still occur. That's when the **speed of your responses is really key**. When your customer submits a chargeback on a transaction, we will inform you about it. We will send you a set of questions and a list of documents we will need from you. If you have any questions, please do not hesitate to contact our customer service.

Refund of payment

Return of the full payment to the customer's account

In your Payout account, look for an available transaction that needs to be cancelled. Once the details are displayed, click on **Refund**.

The screenshot shows a 'Refund payment' dialog box with the following fields and options:

- Full refund?**: A toggle switch that is currently turned on.
- Refundable amount 106.00**: A label indicating the available amount.
- Amount**: A text input field containing '106,00'.
- Name**: A text input field containing 'Payout Company'.
- Note**: An empty text input field.
- Statement descriptor**: A text input field containing 'P COMPANY'.
- Buttons**: 'Cancel' and 'Confirm refund' buttons at the bottom right.

Once the screen is displayed, you can enter **FULL REFUND**.

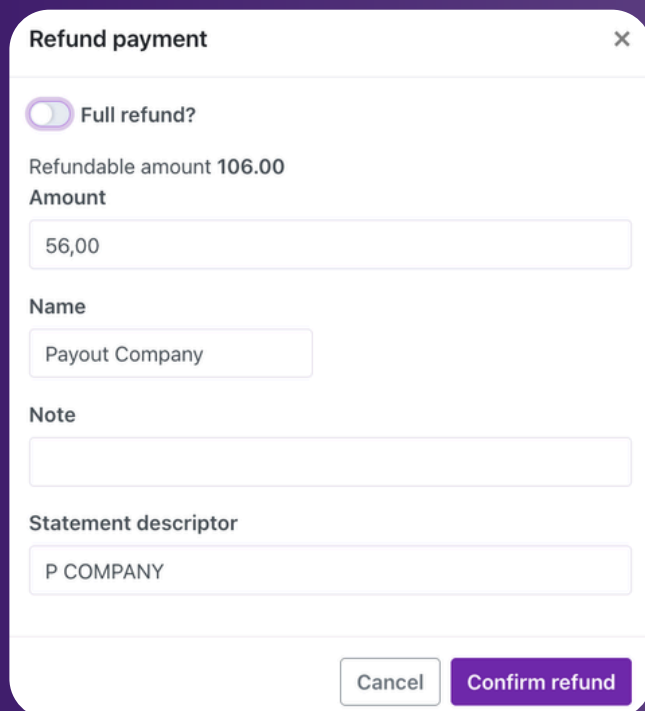

The **AMOUNT** field is automatically populated with the full amount of the refunded payment

The name is filled in automatically, after adding any notes or information for the recipient, you need to **Confirm Refund**.

Refund of payment

Return of partial payment to the customer's account

In your Payout account, look for an available transaction that needs to be cancelled. Once the details are displayed, click on **Refund**.

The screenshot shows a 'Refund payment' dialog box with the following fields and options:

- Full refund?**: A toggle switch that is currently turned off.
- Refundable amount 106.00**: A label indicating the total amount available for refund.
- Amount**: A text input field containing the value '56,00'.
- Name**: A text input field containing the value 'Payout Company'.
- Note**: An empty text input field.
- Statement descriptor**: A text input field containing the value 'P COMPANY'.
- Buttons**: 'Cancel' and 'Confirm refund' buttons at the bottom right.

Once that screen is displayed, there is an option to enter a **PARTIAL REFUND** by clicking the "Full Refund?" button.

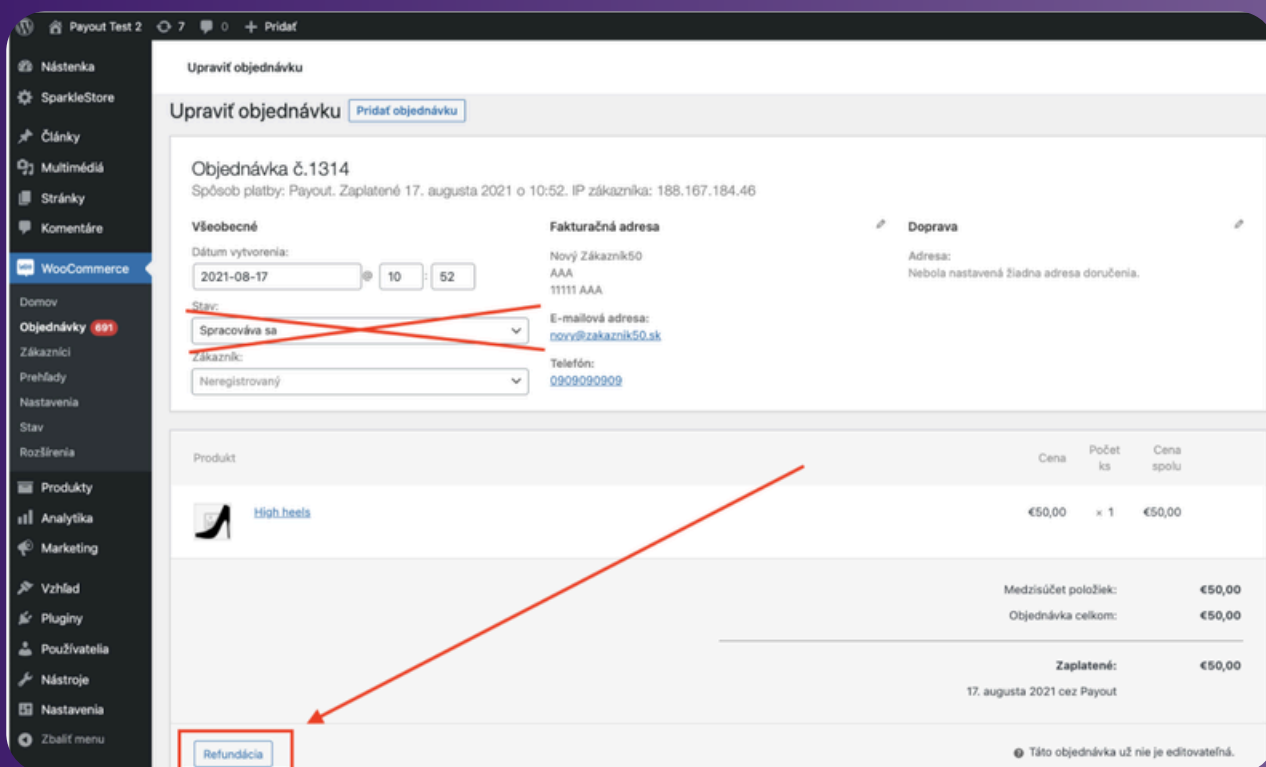

In the AMOUNT field, enter the amount needed to refund the payment.

The name is filled in automatically, after adding any notes or information for the recipient, you need to **Confirm Refund**.

Payment refund

Refunding the payment to the customer's account via WooCommerce

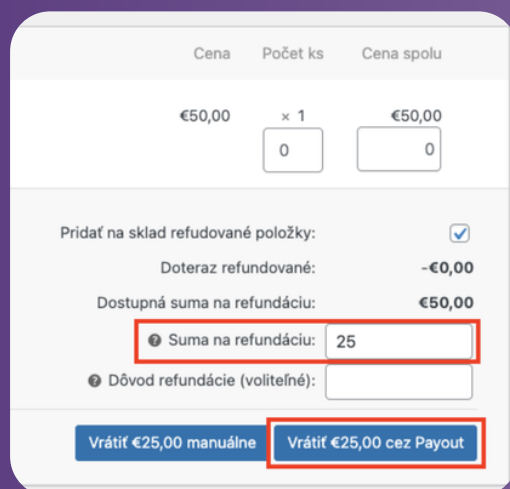

In WooCommerce, search for the order that needs to be cancelled. When you see the details, click on **Refund**.

When the screen is displayed, you can enter a **PART** or **FULL** refund.

In the Refund Amount field, enter the amount needed to refund the payment.

Cancellation needs to be confirmed : **Refund via Payout**.

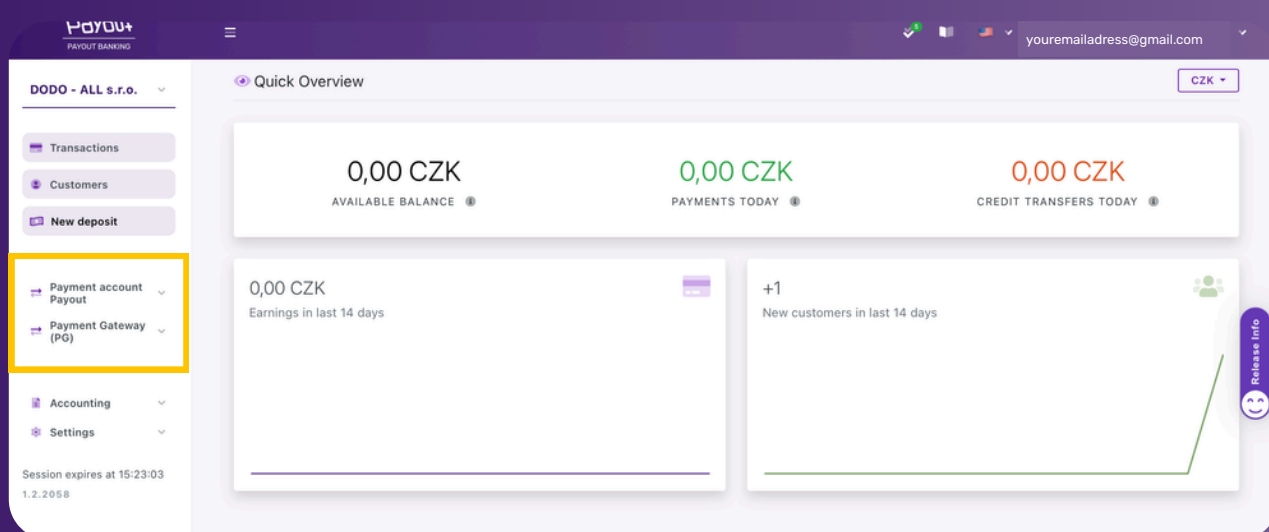

Important note: Do not change the order status!

Service distribution

Payout account (PÚP) and Payout Gateway (PB)

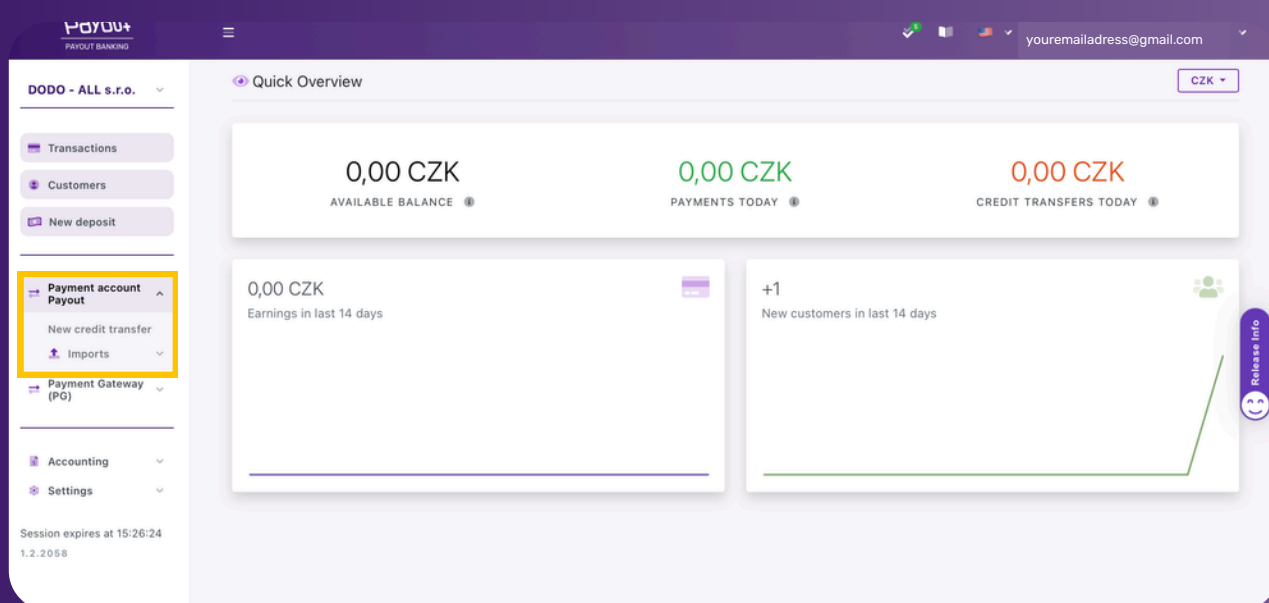

As of **April 1, 2025**, our payment services have been divided into a **Payment account Payout** and a **Payment Gateway(PG)**.

This change is a response to the effectiveness of Act No. 279/2024 Coll. on Financial Transaction Tax, which introduces a tax on selected payment transactions.

Payment account Payout

It allows you to make payments easily and securely. Through PAP, you can make **various types of payments and transfers** of funds according to your needs.

Payment account
Payout

Credit transfer

Disbursement of funds from the Payout payment account to the Payout payment account

To make a payment from your Payout account, you need to click on **Payment account Payout - New credit transfer**.

The screenshot displays the 'New credit transfer' form in the Payout+ interface. The form is titled 'New credit transfer' and includes a checkbox for 'PAP credit transfer'. The fields are as follows:

- E-mail:** A text input field.
- Recipient:** A text input field.
- IBAN:** A text input field with a placeholder example: 'e.g. SK6807200002891987426353'.
- Amount:** A text input field with a currency dropdown set to 'EUR (326 960,66)'.
- Reference:** A text input field with a note: 'If you don't choose reference, it will be automatically generated.'
- Note:** A text input field with a placeholder: 'MOJ text ako popis' and a note: 'This will appear on creditor's statement.'

At the bottom right of the form are 'Back' and 'Process' buttons. The interface also shows a sidebar with navigation options and a 'Release Info' button on the right.

The form must be filled in or data from an existing customer must be loaded.

When making a payment, the minimum balance that must remain in the account and the account withdrawal fee are taken into account. After filling in the form, the payment must be processed and confirmed with a code from the two-factor authentication authenticator.

For these transactions, Payout will be required to calculate and pay financial transaction tax in accordance with the new law.

Payment account
Payout

Credit transfer

Payment of funds from the Payout payment account to the Payout payment account

To make a payment from your Payout account, you need to click on **Payment account Payout - New credit transfer** and tick off **PAP credit transfer**.

The screenshot shows the 'New credit transfer' form in the Payout+ interface. The 'PAP credit transfer' checkbox is checked and highlighted with a yellow box. The form includes the following fields:

- Account ID:** A text input field with a dropdown arrow. Below it, a note states: 'If you choose transfer to Payout, you need to type account id'.
- Amount:** A text input field containing '800' and a currency dropdown set to 'EUR (326 960,66)'. Below it, a note states: 'Funds on your Account must be sufficient to cover the credit transfer and applicable credit transfer fee.'
- Reference:** A text input field. Below it, a note states: 'If you don't choose reference, it will be automatically generated.'
- Note:** A text input field. Below it, a note states: 'This will appear on creditor's statement.'

At the bottom right of the form, there are 'Back' and 'Process' buttons. A 'Release info' button is also visible on the right side of the form.

From your Payout payment account, you can also make a **simplified payment to another Payout payment account**, provided you know its ID.

You can find the ID of your Payout payment account in **Settings - Account - External Account ID**.

When making a payment, the minimum balance that must remain in the account and the account withdrawal fee are taken into account. After filling in the form, the payment must be processed and confirmed with a code from the two-factor authentication authenticator.

Payment account
Payout

Reimbursement

Creating a recurring reimbursement

To make a recurring payment from your Payout account, you need to click on Account Movements - **Transactions**. In the filter or in the list of transactions, search for the payment you want to repeat.

The screenshot shows the Payout+ web interface. On the left is a navigation menu with 'Transactions' highlighted. The main area displays a transaction of 150,00 EUR with a green 'AVAILABLE' status. A yellow box highlights the 'Repeat credit transfer' button in the top right corner. Below the transaction summary are sections for 'Transaction details' and 'Credit transfer details'.

Transaction details	
ID	71177
Funds	AVAILABLE ✓
Amount	150,00

Net	151,50
Customer	[Customer Name]
Reference	34822407
Date	08.01.2024 09:29:12

Credit transfer details	
ID	50725
Status	PAID ✓

Click on the transaction to view the transaction detail and click on the button - **Repeat credit transfer** in the top right corner

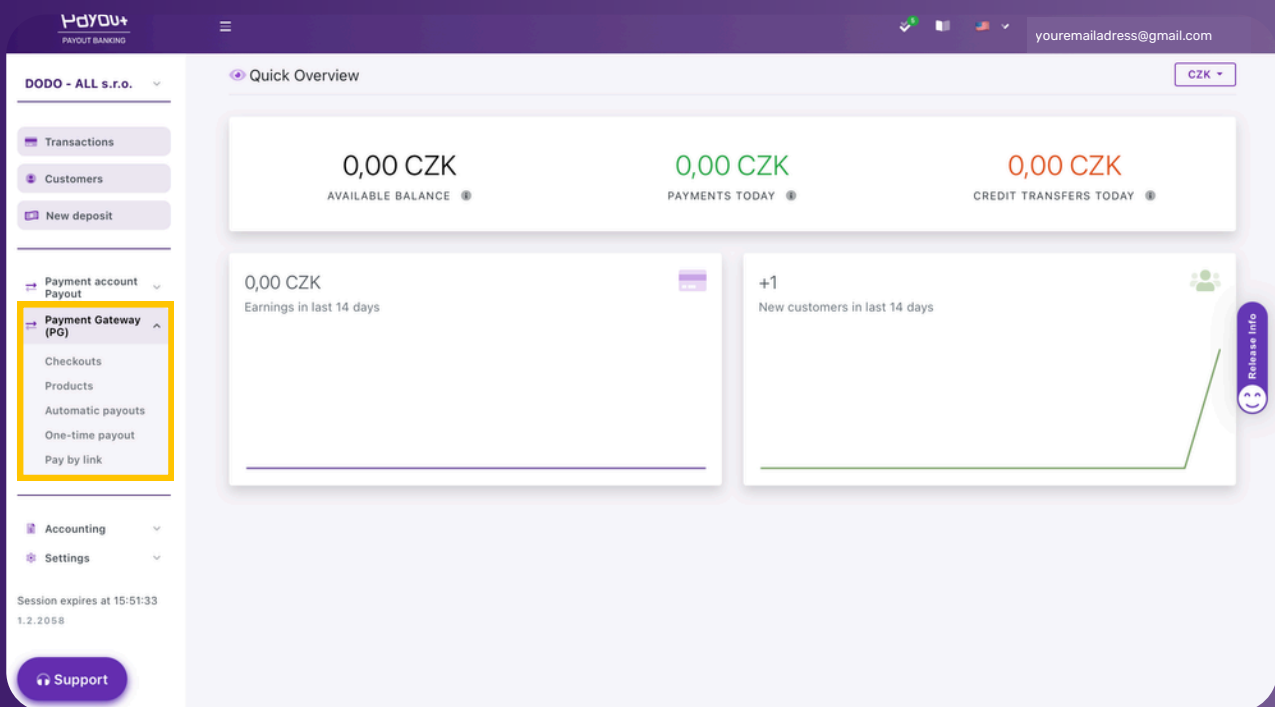

Payment account
Payout

Payment Gateway (PG)

It enables fast and secure online payments from your customers.

It allows merchants to accept payments via:

- ✓ **Payment cards** (VISA, Mastercard)
- ✓ **Bank buttons** (instant online payments via internet banking)
- ✓ **Bank transfers** (standard transfers from the customer's bank account)

In addition to accepting payments via the payment gateway, it also performs the following functions:

- ✓ **Payment refunds** – in the event of order cancellation or complaints
- ✓ **Chargebacks** – situations where customers dispute payments with their banks
- ✓ **Balance payments (withdrawals)** – transfers of received payments to your bank account

Payment Gateway

Automatic payouts

Set up automatic payouts from the Payment Gateway

To create a new automatic discharge, go to **Payment Gateway - Automatic payouts** and click on **New automatic payout**.

The top screenshot shows the 'Automatic payouts' table with the following data:

FREQUENCY	IBAN	CURRENCY	TYPE	STATUS	CREATED AT
Daily	SK941100000008012451497	CZK	Payout till minimal balance	ACTIVE	25.06.2025 13:01:25

The bottom screenshot shows the 'New automatic payout' form with the following fields:

- Currency: EUR (326 961,16)
- IBAN: SK3011110000009923208601
- Frequency: Daily
- Type: Payout till minimal balance

Buttons: Back, Process, Release info

Choose from 3 types of automatic withdrawal - *after a minimum balance, after a specified amount, or a fixed amount.*

Automatic withdrawal can be set up on a *daily, weekly* (on a specific day), or *monthly* basis, always on the 1st day of the month.

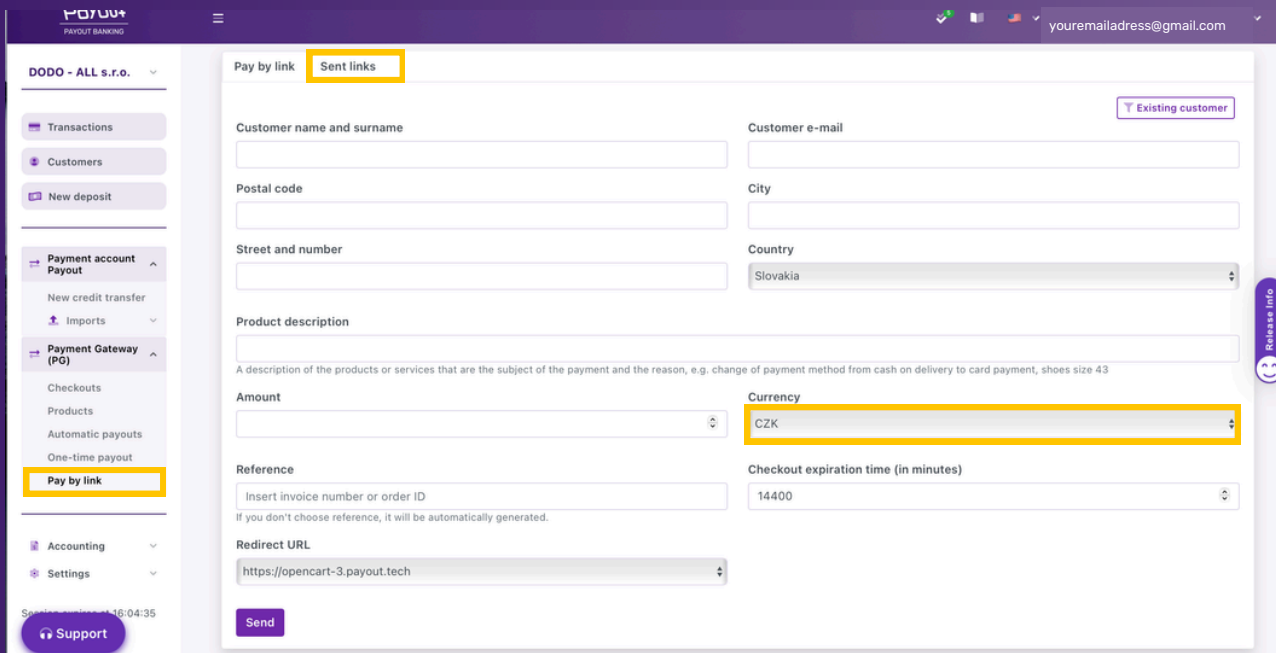

The fee for performing an automatic withdrawal is the same as for a payment according to the fee schedule in the given currency.

Please note: Only approved IBANs can be used for payouts. If you wish to add another IBAN, please contact our Sales Department via the contact form on our website payout.one or at contact@payout.one.

Link payment

Create a link to a specific order in a few clicks

To create a payment link from your Payout account, you need to click on **Account Movements - Pay by link**.

The screenshot shows the 'Pay by link' form in the Payout Gateway interface. The form is titled 'Pay by link' and has a 'Sent links' tab selected. The form fields are as follows:

- Customer name and surname**: Text input field.
- Customer e-mail**: Text input field with an 'Existing customer' checkbox.
- Postal code**: Text input field.
- City**: Text input field.
- Street and number**: Text input field.
- Country**: Dropdown menu with 'Slovakia' selected.
- Product description**: Text input field with a placeholder: 'A description of the products or services that are the subject of the payment and the reason, e.g. change of payment method from cash on delivery to card payment, shoes size 43'.
- Amount**: Text input field.
- Currency**: Dropdown menu with 'CZK' selected.
- Reference**: Text input field with a placeholder: 'Insert invoice number or order ID'. Below it, a note says: 'If you don't choose reference, it will be automatically generated.'
- Checkout expiration time (in minutes)**: Text input field with '14400' entered.
- Redirect URL**: Text input field with 'https://opencart-3.payout.tech' entered.

A 'Send' button is located at the bottom left of the form. The left sidebar contains navigation options: Transactions, Customers, New deposit, Payment account Payout (New credit transfer, Imports), Payment Gateway (PG) (Checkouts, Products, Automatic payouts, One-time payout, Pay by link), Accounting, and Settings. A 'Support' button is at the bottom left of the sidebar.

The customer receives an email, **after clicking on the button he is redirected to checkout**, where he can pay for the order, according to the data from the filled form.

It is possible to create link payments in **multiple currencies** from a Payout payment account.

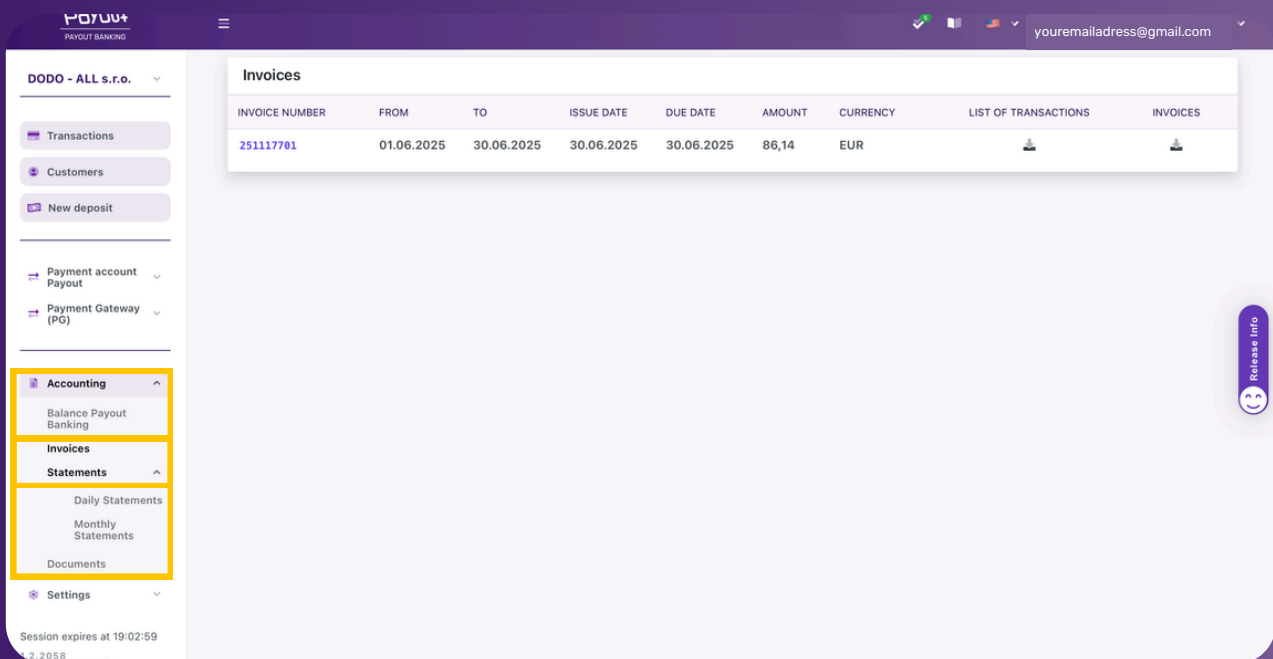

The list of created link payments can be found in the **Sent links** tab.

Payout Gateway

Statement/invoice

Download documents for billing as a basis for accounting

To download a transaction statement from your Payout account, click on **Accounting - Statements - Daily**, (or) **Monthly Statements**.

To download your monthly invoice from your Payout account, click on **Accounting - Invoices**.

Daily statements and invoices can be downloaded in **XML** and **PDF** format.

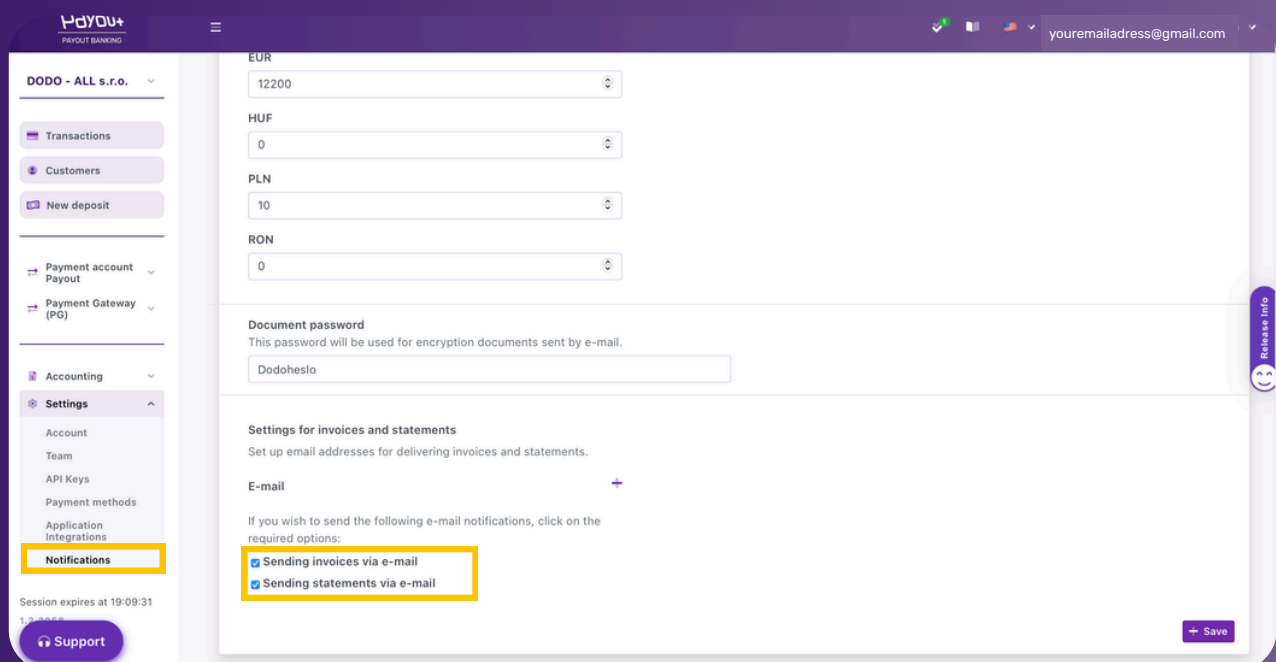

Please note: If you wish to change the frequency of statement generation, please contact our Sales Department via the contact form on our payout.one page or at contact@payout.one.

Payout Gateway

Invoice/Statement Delivery

Settings for sending statements and invoices via email.

To set up the delivery of invoices and statements from the Payout payment account, go to **Settings - Notifications**

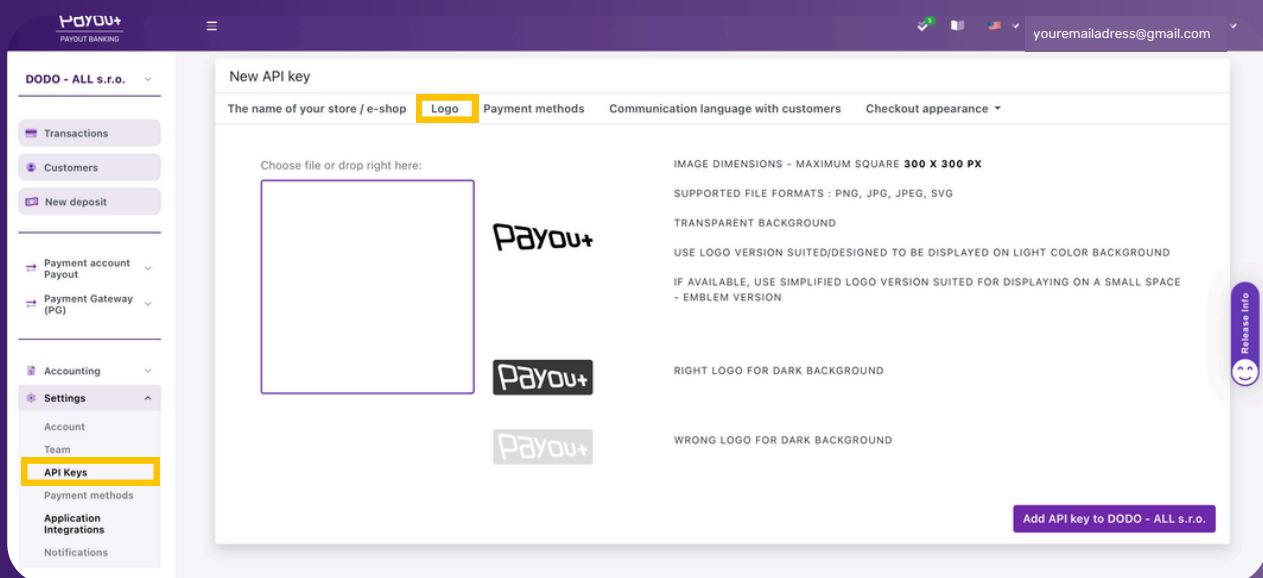

In the settings, you can choose which email addresses will receive invoices and which receive statements. Simply enter your preferred email address and select *one* or *both* options - **Sending invoices via e-mail/Sending statements via e-mail**.

Design modification

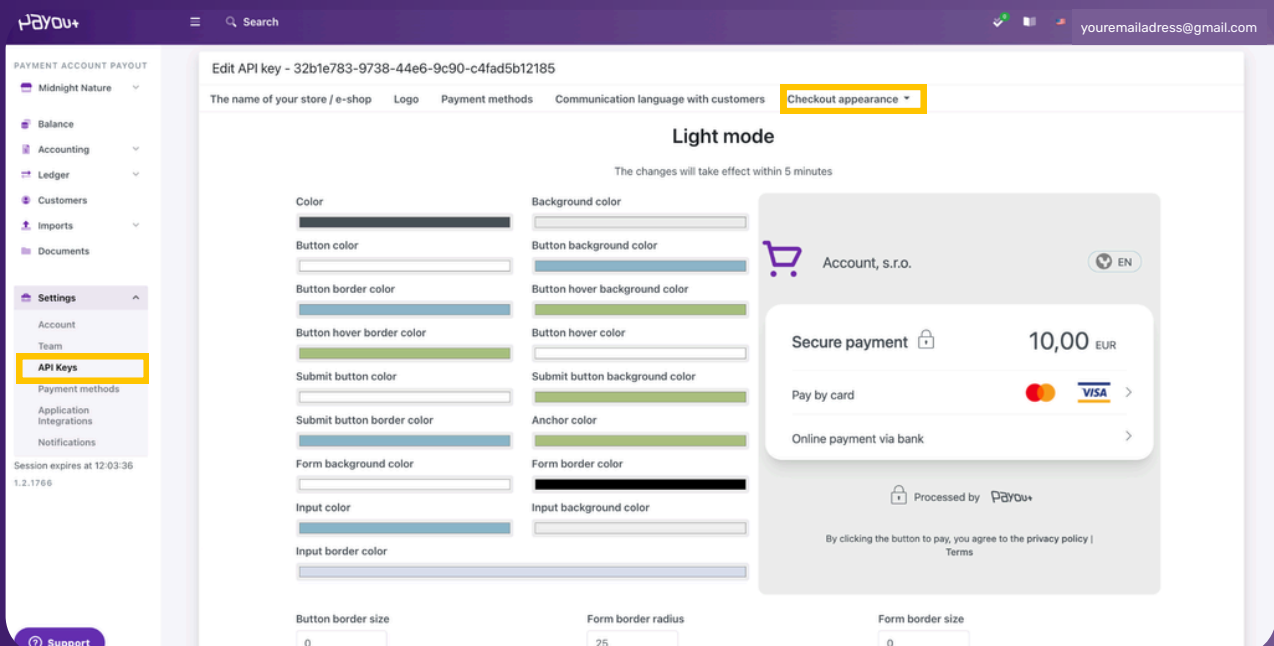

Logo insertion in the payment form

Please note: Please follow all recommendations for the correct display of the logo. At the same time, it is possible to have a **different logo** for each API key.

The Payout payment gateway also allows you to **customize the appearance of the checkout form** according to your preferences.

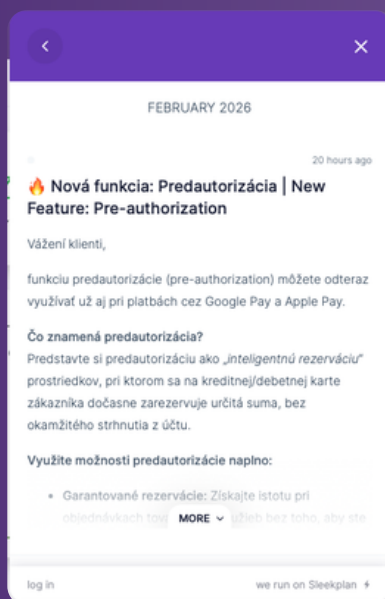

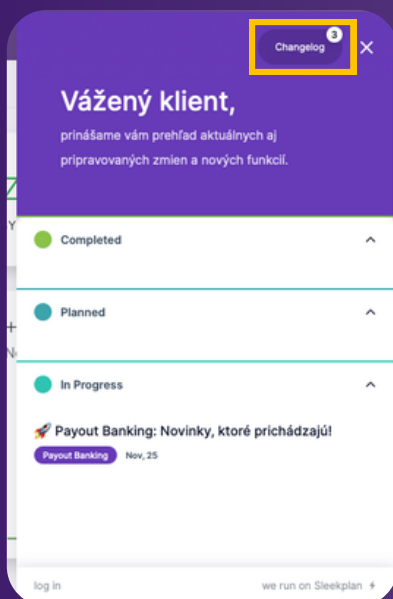

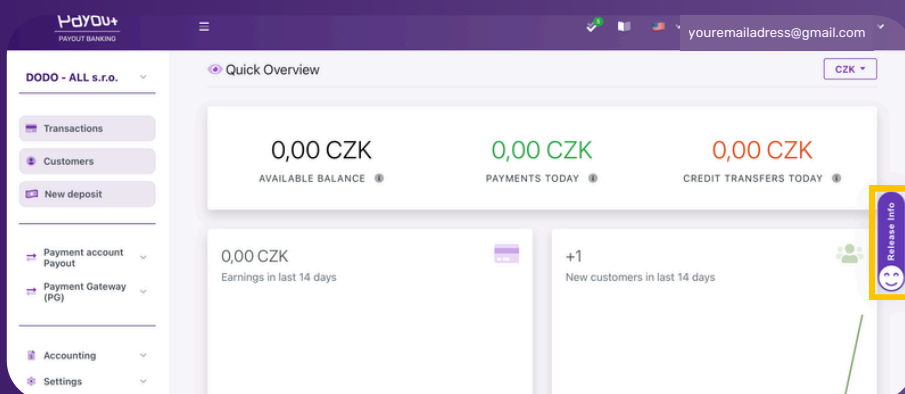

This modification is possible in the **Settings - API Keys - Checkout appearance**.

Notifications

Follow the news directly in Payout Banking

Notifications in the Payout Banking environment are available to you directly on the main screen on the right in the **Release info** section.

After clicking, a window will open where you will find all important information, including **planned improvements**, **successful updates**, and **news**. We recommend that you check these notifications regularly so that you are informed of all important changes in a timely manner. *We believe that this overview will help you take full advantage of all the features of our system.*

Logos

Placement on your page

As part of our *General Terms and Conditions*, each Client is obliged to place the Payout, **VISA** and **Mastercard** logos on its website without undue delay after the integration of the Payout Gateway. The Client is entitled to use the Payout logo in accordance with the terms and conditions communicated by Payout, but in particular is not entitled to change or otherwise interfere with the logo.

Client references

Martin Dobiš
CTO **greenway**

"We are very satisfied with the Payout payment gateway. We appreciate the quality and reliability of the services, fast customer support, and fair, sustainable pricing policy. We definitely recommend it!"

Marek Kudzbel
CEO **CROWDMEUP**

At Crowdmeup, we make sure our investors feel safe. That's why we chose Payout, a licensed payment institution, to process payments. Thanks to them, all deposits and withdrawals are fast, reliable, and meet strict security standards. Our investors have nothing to worry about—their money is in good hands."

Tomáš Barčík
CPO **INVESTBAY**

"We have been working with Payout for a long time and appreciate their pragmatic approach and ability to respond quickly to technical and integration challenges. In our segment of fractional investing and crowdfunding, where technology and regulations are constantly changing, flexibility and willingness to seek functional solutions are key. This makes Payout an important partner."
