About us

Fintech that moves your business forward.

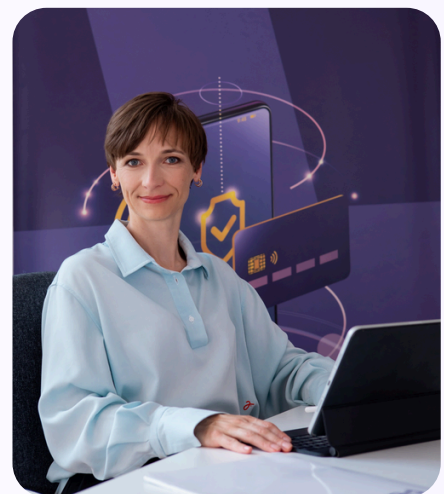

More in the field of transaction processing, better customer service. The purpose of our work is to provide clients with access to high-quality and efficient solutions in the field of financial technologies. Payout is creative, innovative, and stubbornly pursues its business. It uses its unique ability to see the world of Slovak finance differently. We write our authentic story through our own work.

"Payout offers a combination of flexibility, speed and security. Our approach is innovation in the sense of: 'Move money like data'. Our payment infrastructure is modular, which means clients can choose exactly the features they need."

- Jana Hmírová, CEO, Payout a.s.

Security recommendations for signing in

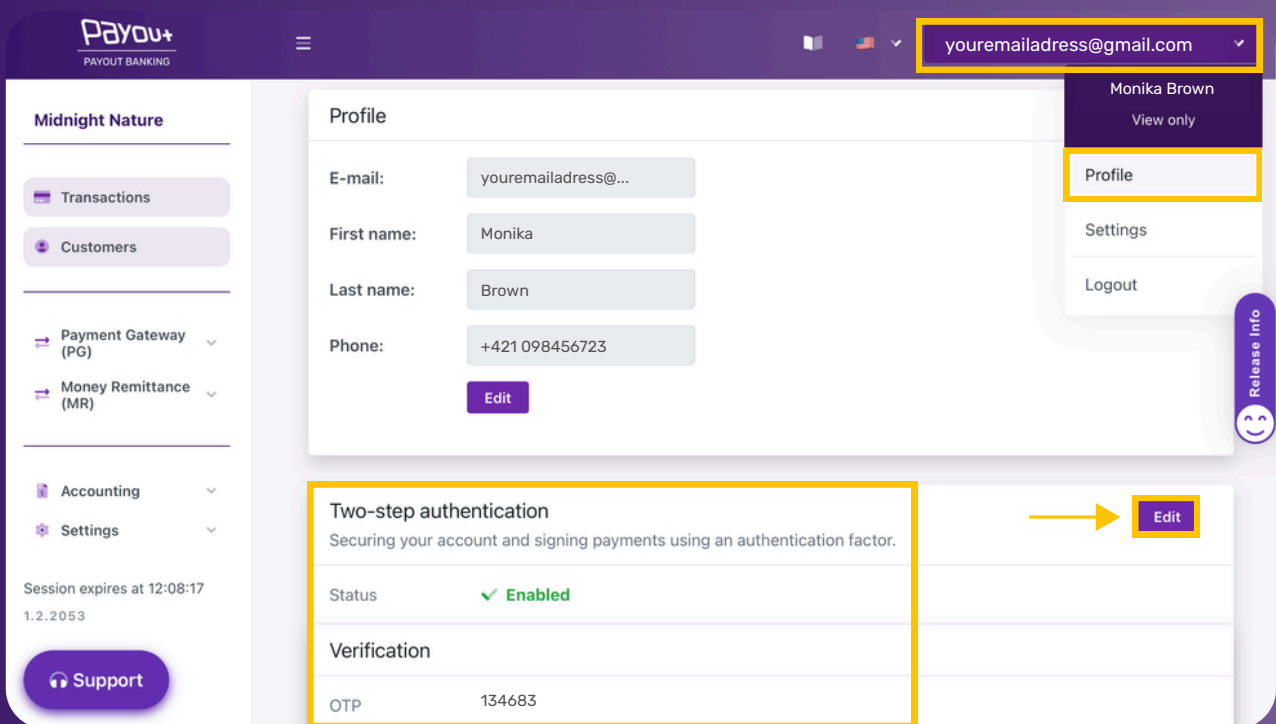

- Check the email address: Before signing in, make sure the address you are using belongs to the official Payout domain.
- Be careful with links: Never click on links claiming to be from Payout Banking if you don't recognize them. We do not send Payout links by email.
- Loss of login credentials: In case of loss or theft of authentication data, contact us at support@payout.one.

Don't have an account? Sign Up

2FA

Setting up/changing two-factor authentication

After logging into the Payout app, click on your **email address** in the upper right corner -> **Profile**.

In the Two-factor authentication section, click the **Edit** button.

After clicking the Edit button, a new window with additional settings will open. In this window, go to the **Two-step authentication** section.

2FA

Setting up/changing two-factor authentication

To change the code, you need to do the following:

- ➔ Enter your **current password** that you use to log in to Payout Banking in the field.
- ➔ Then click on the **Change** button on the right side of the window.

Two-step authentication

Two-factor authentication increases the security of your account by adding an extra layer of protection. When signing in, you will need not only your password but also a verification code from an authentication app.

Status: **Activated**

Current password:

Change

[← Back to Payout Banking](#)

Enable second-step authentication

Download the free **Google Authenticator** app, add a new account, and then scan this barcode to set up your account.

Enter code manually instead

Code:

Confirm code

A **QR code** will be displayed for you to scan in the authentication app. We recommend using the **Google Authenticator app**.

After scanning the QR code, enter the **6-digit code** from the authenticator and **Confirm code**.

Each time you log in or confirm a payment, you will enter the code from your preferred authenticator.

Generating API keys

Click on **Settings** - **API Keys**. A screen will appear - click on **"Generate a new key"**.

The screenshot shows the 'API Keys' management interface in the Payout+ system. A sidebar on the left contains navigation options: Transactions, Customers, New deposit, Payment account Payout, Payment Gateway (PG), Accounting, Settings (highlighted), Account, Team, API Keys (highlighted), Payment methods, Application Integrations, and Notifications. The main content area displays a table of existing API keys with columns for KEY ID, PUBLIC KEY, ACTIVE, NAME, and NOTIFY URL. A 'Generate a new key' button is visible in the top right corner of the table area. The table lists several keys, including one for 'DODO ALL New API Key OpenCart'.

KEY ID	PUBLIC KEY	ACTIVE	NAME	NOTIFY URL

Notification URL: A field will appear where you can enter the **URL address** provided by the developer and click on the **"Add API key"** button.

The screenshot shows the 'New API key' form in the Payout+ system. The sidebar on the left is identical to the previous screenshot, with 'Settings' and 'API Keys' highlighted. The main content area contains a form with the following fields and options:

- The name of your store / e-shop:** Logo, Payment methods, Communication language with customers, Checkout appearance
- Notification URL address:** A text input field containing 'https://', a dropdown menu set to 'opencart-3.payout.tech', and a trailing slash.
- Limited API Key:** A dropdown menu with 'Basic Key - Enables payments processing.' selected. Below it, text explains: 'Basic Key - Enables payment creation and is ideal for plugins like PrestaShop or WooCommerce. Extended Key - Enables payments and refund processing. Suitable for plugins requiring direct refund management, like PrestaShop or WordPress. Advanced Key - Provides access to all features including payments, refunds and credit transfers. Not recommended for plugins as it's designed for complex solutions outside plugin environments.'
- The name of your store / e-shop:** A text input field with the note 'This name will be displayed to your customers.'

A yellow arrow points to the 'Add API key to DODO - ALL s.r.o.' button at the bottom right of the form.

Generating API keys

The system will generate: a key and Secret ID for the selected **notification URL**, which must be sent back to the developer to complete the integration.

Your new API key

Key	b139df68-7c4c-44c6-b854-363628ef43a1

Logos

Placement on your page

As part of our *General Terms and Conditions*, each Client is obliged to place the Payout, **VISA** and **Mastercard** logos on its website without undue delay after the integration of the Payout Gateway. The Client is entitled to use the Payout logo in accordance with the terms and conditions communicated by Payout, but in particular is not entitled to change or otherwise interfere with the logo.

Client references

Martin Dobiš
CTO **greenway**

"We are very satisfied with the Payout payment gateway. We appreciate the quality and reliability of the services, fast customer support, and fair, sustainable pricing policy. We definitely recommend it!"

Marek Kudzbel
CEO **CROWDMEUP**

At Crowdmeup, we make sure our investors feel safe. That's why we chose Payout, a licensed payment institution, to process payments. Thanks to them, all deposits and withdrawals are fast, reliable, and meet strict security standards. Our investors have nothing to worry about—their money is in good hands."

Tomáš Barčík
CPO **INVESTBAY**

"We have been working with Payout for a long time and appreciate their pragmatic approach and ability to respond quickly to technical and integration challenges. In our segment of fractional investing and crowdfunding, where technology and regulations are constantly changing, flexibility and willingness to seek functional solutions are key. This makes Payout an important partner."
